

Edson C. Tandoc Jr.

Associate Professor

Research Focus: **Journalism and New Technology**
Wee Kim Wee School of Communication and Information
Nanyang Technological University
Room 02-39, 31 Nanyang Link, Singapore 637718
Phone: (65) 6790-6110 GMT+8h
edson@ntu.edu.sg

Associate Editor, Digital Journalism

Associate Editor, Asian Journal of Communication

Secretary, International Communication Association (Journalism Studies Division)

EMPLOYMENT HISTORY

2018-present	Associate Professor	Nanyang Technological University, Singapore	<i>Responsible for teaching courses across undergraduate and graduate levels and conducting research</i>
2014-2018	Assistant Professor	Nanyang Technological University, Singapore	<i>Responsible for teaching courses across undergraduate and graduate levels and conducting research</i>
2012-2013	Graduate Instructor	University of Missouri	<i>Taught undergraduate courses on news writing and graduate courses on mass communication theory</i>
2003-2010	Reporter	Philippine Daily Inquirer	<i>Assigned to write stories from the political beat; covered the 2010 national elections</i>
2008-2010	Part-time lecturer	University of the Philippines	<i>Taught undergraduate courses on news writing and journalism research</i>

ACADEMIC QUALIFICATIONS

Ph.D. in Journalism	2010-2013	University of Missouri-Columbia <i>Fulbright Scholar</i> <i>Inducted into Kappa Tau Alpha</i> <i>(Top 10% of the Graduating Class)</i>	Dissertation: <i>"Web analytics, social media and the journalistic doxa: The impact of audience feedback on the evolving gatekeeping process."</i> Advisor: Dr. Tim P. Vos
Master of Mass Communication	2007-2008	Nanyang Technological University-Singapore <i>ASEAN Graduate Scholar</i> <i>Media Development Authority Book Award</i> <i>(Top MMC Graduate, Academic Track)</i>	Thesis: <i>"The pseudo-events paradox: How pseudo-events flood the Philippine press and why journalists don't recognize it."</i> Advisor: Dr. Marko Skoric
BA Journalism	1999-2003	University of the Philippines-Diliman <i>Summa cum Laude</i>	Thesis: <i>"The blotter, crimes against ethics: Consolidation and analysis of ethical standards and practices in police beat reporting."</i> Advisor: Dr. Paz Diaz

RESEARCH

Journalism and New Technology

*My scholarship generally focuses on the intersection between journalism and new technology. I study journalism from both the **news production** and **news consumption** side. These two are inextricably linked—while news audiences can be influenced by news stories produced by journalists, journalists can also be influenced by the feedback that comes from the audience. This is particularly salient in the age of web analytics and social media that allow quick and instantaneous interaction between **journalists** and **audiences**.*

News production

*I study how the use of new technologies, such as social media and web analytics, changes **journalistic roles, routines and norms**. These tools provide journalists easy access to audience data that report audience behavior and response to journalistic outputs. My focus is on news, but I also test the theoretical frameworks I have developed in specialized areas of journalism, including environmental journalism, health reporting, and sports journalism.*

News consumption

*I also study how new technologies, such as social media and web analytics, changes **the ways audiences access and process news and with what effects**. Having studied news production processes extensively, I recognize the important role of the audience in journalism. Thus, I also study news consumption patterns on social media, readers' comments to specific issues and to journalism, as well as the problem of fake news and its impact on news credibility.*

Synthesis

Studying both news production and consumption processes is important, especially in this period when news production is no longer a monopoly of journalists. An increasing number of social media users now engage in journalistic acts, sharing photos or videos of newsworthy events they witness first-hand; commenting on issues they consider relevant; and publicly questioning journalistic accounts they are not satisfied with. New technologies are changing the relationship between journalists and audiences, challenging traditional definitions of who can be called a "journalist." Both streams of my research, focusing on news production and consumption, explore the ways journalism and new technologies intersect and with what results.
